PERSONAL PROJECTS

Airbnb Clone
- I've created this application by using ReactJS, bootstrap, Backend is powered by NodeJS. The basic idea of this application is to learn and design how real-world applications are built.

Food Delivery System
- This application provides a list of restaurants which users can choose from the menu and order the food.

Open Movie Database
- Help users to find movies and TV shows using OMDB api.

Covid-19 Tracker
- This application helps users to track covid-19 spread across the world. Built using Bootstrap, Covid19 API and Javascript.

Task Reminder Extension
- Its a chrome extension, built for developers where they can add tasks and set reminders without leaving the browser.
